Power Transformer Control Cabinets

Engineered control for utility grade transformers, built to your spec, delivered with consistency at scale.

Panelmatic designs and builds engineered control cabinets that aim to safeguard transformer performance and keep projects on schedule. With more than six decades of execution, a national manufacturing footprint, and a culture of ownership, we deliver repeatable quality for complex, high-volume, large-scale programs.

Why Panelmatic

- **Capacity you can count on.** 1,000,000+ sq ft of U.S. manufacturing capacity across multiple sites enables reliable throughput for program work and blanket orders. Houston 728k, Conroe 183k, Youngstown 44k, Brookfield 72k. Vancouver BC 31k if applicable.
- **Consistency at scale.** Engineered builds that repeat so the next hundred match the first and arrive on time.
- **Flexibility when things change.** We work with you to accommodate design and schedule changes to minimize impact.
- **Since 1957.** A trusted, U.S. electrical solutions partner for industrial and utility customers.

Who We Are

Panelmatic focuses on Capacity, Quality, Consistency and Flexibility to reduce downtime, lost revenue and lost contracts

Markets We Serve

- Utilities
- Data Centers
- Industrials
- Renewables

What We Provide

- **Transformer applications.** GSUs, auto-transformers, distribution transformers, and LTC-equipped units.
- **Engineering and documentation.** Design to customer spec, wiring diagrams, fabrication and assembly, functional testing.
- **Protection and controls integration.** Relay, control, and monitoring solutions with compatibility across relay brands, plus integrated RTU and SCADA options.
- **Enclosures for any environment.** Indoor and outdoor designs with appropriate NEMA ratings and thermal or ventilation provisions per project requirements.
- **Quality and compliance.** Builds to recognized industry standards such as NEMA, ANSI, IEEE, and NEC as required. UL 508A applied where applicable for industrial control panels.

We give you the power to hold us accountable and the control to specify quality production.

Integration Pathways

- **Factory-integrated control houses.** When projects require a protected, tested environment, Panelmatic delivers turnkey Packaged Equipment Centers and Integrated Control Houses with relay and control panels pre-installed, wired, and validated for efficient site hookup.
- **On-site integration and startup.** For industrial installations, our teams support installation, IO checkout, and startup at the end-user site. Cross-reference Field Services.

About Panelmatic

Panelmatic is a national electrical solutions provider that builds high-integrity power systems for industrial and utility customers. Our customer-focused mindset and master craftsmanship continue from the first engagement to the jobsite and beyond.

Core Offerings

- **Control and Relay Panels** engineered to spec with drawings, fabrication, wiring, and factory testing.
- **Packaged Equipment Centers and Integrated Control Houses** are modular, fully integrated, and tested for fast, safe installation.
- **Automation and Control Services** from design through commissioning, leveraging deep controls expertise.

Utilization of Equipment

Utility substations, power generation, and large industrial sites where reliable transformer control and protection are essential and where repeatable quality across many units matters most.
