

# Industrial Control Panels

## Custom-Built Control Panels

**Built to Print. Built to Spec. Built to Perform.**

Panelmatic designs and fabricates industrial control panels for OEMs, system integrators, utilities, and industrial end users. Whether you need a one-off custom build or high-volume production, we assemble, wire, test, and deliver panels ready for installation and operation. From simple relay panels to complex process control systems, we provide dependable panel solutions that support modern industrial infrastructure.

## Markets Served

- Automation
- Automotive
- Chemical
- Data Centers
- Energy
- Food & Beverage
- Infrastructure
- Material Handling
- Metals
- Oil & Gas
- Pharmaceutical
- Power Generation
- Water / Wastewater

## Why Panelmatic

- Five locations across North America
- Experienced electrical engineering team
- In-house fabrication, assembly, and testing
- Scalable production capacity
- High-level quality control and inspection
- Responsive support from concept to completion

## What We Do

- Build-to-print industrial control panels
- Custom panel assembly and wiring
- In-house fabrication and integration
- Functional testing prior to shipment
- Quality inspection before delivery
- Universal PLC programming across Rockwell, Siemens, and CODESYS platforms.

Panels are assembled to customer specifications and delivered ready for installation.

## Certifications

- ISO 9001
- UL 508A
- CSA
- CE
- UL698a
